OUR STORY

Esor is a small basque foundry specialized in making handles that was born out of the deep-rooted basque tradition of metal works.

From its beginnings it aims to differentiate itself by elaborating delicately finished products, for which its manual processes of production are key. Craft working steps by which pieces are manipulated one by one until smooth, visually attractive surfaces are obtained.

INTERESTING NOTES

We are ready to help our clients to develop their ideas or special projects.

The handles must only be installed once the walls, ceilings, floors, doors and windows have been painted and are completely dry.

Be aware that some cleaning products (detergents, acids, alcohol, dissolvent...) can be corrosive and can damage the product.

Handles must only be cleaned with a dry cloth.

Handles shown in this catalogue are available in all the different finishes offered for each group. Nevertheless, there is some exceptional cases in which for technical reasons this is not possible.

Manufacturas ESOR S.L. has the right to modify dimensions, shapes or finishes, as well as eliminating models if there is any technical or productive reason that justifies it.
